Climatic Testing Systems

Bringing the Desired Climate to Your Doorstep

Conditioned Air Supply

- Combustion air, Dilution Air and Make-Up air supply applications.
- Sea Level to 5000m altitude simulation.
- Integrated Air Conditioning Unit (ACU) and Pressure Control Unit (PCU) for maximum stability and control.

- Wide temperature control range from -40°F to 185°F.
- Wide Humidity control range.

- Multiple Cell supply from single unit with independent pressure control.
- Low temperature high humidity units for Brake Dynamometer testing.

- ≤15 seconds response time to temperature and humidity set point change.
- ≤3 seconds response time to pressure set point change.
- Air Cooled and Water Cooled refrigeration Systems or Chilled water cooling.
- Indoor and outdoor installation.
